Course Overview

› The Arthrex Hand & Wrist Course is designed to provide surgeons with practical, up-to-date knowledge of contemporary hand and wrist surgery. The program covers ligament injuries, fractures, arthroscopic and reconstructive techniques, degenerative conditions, and orthobiologics, offering participants valuable insights into current treatment concepts and surgical solutions.

Learning Objectives

- › Upon completion of the course, participants will be able to:
 - Review key anatomical and biomechanical principles of the hand and wrist.
 - Discuss current treatment options for scapholunate injuries.
 - Understand surgical management of common hand and wrist fractures.
 - Evaluate arthroscopic techniques for the diagnosis and treatment of hand and wrist conditions.
 - Review treatment options for degenerative disorders of the hand and wrist.
 - Assess the role of orthobiologics in upper extremity surgery.

Target Audience

- Specialists in Orthopedic Surgery and Traumatology
- Hand and Wrist Surgeons
- Plastic and Reconstructive Surgeons with an interest in hand surgery
- Residents in Orthopedic Surgery and Traumatology
- Residents in Plastic, Reconstructive and Aesthetic Surgery with an interest in hand surgery
